ANNOUNCEMENTS

Awards

We are excited to share that when some of our members head to Maryland in a couple of months, for Construct, the National CSI conference, they will be representing our chapter in receiving some awards that we recently found out that we - and one of our members in particular - have earned recognition!

Our CSI Grand Rapids award recipients are listed below - and we proclaim a heartfelt congratulations to them all and, I think we can agree, a well-deserved recognition for Ed Avink! Congratulations, Ed!

Hans William Meier Award for Innovation of Certification Programs

This award is presented to a CSI member or team recognized by their peers as providing innovations in certification preparation and training methods or procedures.

Edwin "Ed" Avink, CSI, CCS, CDT

Communication Award

This award is presented to a Chapter, Region, or Organization which has implemented a comprehensive communications program, inclusive of multiple types of communications programs.

Annual "Hoja" Hojnacki Scholarship Golf Outing

OCTOBER 17

CONSTRUCT Recap
Welcome:

The 2020 CSI Fiscal Year is upon us. We have an incredible dynamic happening within our chapter right now that should be no real surprise because it mirrors what is happening in the construction industry itself. We have a strong group of industry veterans that have lead the way for years but we also have a growing number of women and young professionals joining the chapter. This incredible diversity is reflected not only in our chapter as a whole, but in our Board of Directors as well as the Executive Board (where ½ of the people on the Executive Board are 36...myself being one of them). Another fun fact, our chapter member (whose name adorns our annual scholarship golf outing) joined the chapter 5 years before I was born! With all of that in mind, it’s an exciting time for the chapter but also a challenging time if we fail to recognize the needs of each group and act accordingly.

Two Chapter Goals:

When we look back a year from now, I hope to be able to say we achieved these two goals. First, I want to be able to say our communication to the chapter has never been better. Second, that we were able to deliver value well beyond every chapter members’ dues.

In an age of digital communication, our millennial task-force is “on it” continuously improving our email, website, and social media presence. In fact, the announcement about our website and event calendar you’ll see in this edition should be enough, in some people’s minds, to even mark that first goal complete right out of the gate! Our continued attention will no doubt further improve our communication to the chapter. The far more daunting goal this year will be to continue to deliver to the expectations of our senior chapter members while offering new things to attract and retain younger professionals. Our senior members are the foundation of the chapter and an incredible wealth of knowledge. We will absolutely ensure our chapter delivers what has kept them coming back for the last 20+ years. On the other side of that coin though, we look to the future and continue building on last year by establishing new ways to allow young and emerging professionals to interact, develop skills and networks, and find the real value (in their terms) that comes with a CSI Grand Rapids membership.

In Summary:

We’ve got a great year ahead. I expect some things will feel comfortable and familiar while other things will seem new. But it will all be in support of the two goals above and we’re going to have fun doing it. I look forward to seeing you at future events!

Justin DeMarco, CDT
President, CSI Grand Rapids
Stop and Smell The Roses! CSI GR September Tour of Frederik Meijer Gardens & Sculpture Park

We are inviting you to stop and smell the roses during an incredible exclusive tour taking place at the Frederik Meijer Gardens & Sculpture Park. The evening will walk us through the recently completed construction (~$20 million) as well as introduce the construction underway (another $52 million). Light food and drinks will be served following the tour. We hope to see you there!
OUR MISSION
To advance construction documentation and educate building teams to improve project performance in West Michigan

SCHOLARSHIP / GOLF OUTING COMMITTEE

SCHOLARSHIP RECIPIENT: TREVOR GARLAND

Trevor Garland, Architectural Intern, joined Kingscott Associates in May of 2018. He spent the previous year as an intern through the IPAL program with Albert Kahn Associates, while finishing the latter end of his undergraduate architecture degree at Lawrence Tech University.

Trevor has spent the first couple years in his professional career trying to learn as much as he possibly can about the different corners of the architecture industry. He hopes this process will give him a clear idea on specifically where he’d like to specialize in the long term. In a vast array of architecture-related topics, Trevor is most excited to continue exploring CNC milling, 3D-printing, and Virtual and Augmented reality.

Congratulations, Trevor!

MEMBERSHIP COMMITTEE

CSI GR is committed to: Networking, Learning, and Fun.

Memberships are open to those looking to build both industry relationships and opportunities.

If you are interested in membership, or know of someone who would benefit from joining, please go to CSI’s signup page (https://www.csiresources.org/join) or reach out to Ben Buter: bbuter@versoagency.com

Joining CSI-GR will immediately expand your industry connections and gain you access to many opportunities through which you can build your career.

Learning:

Certification

CSI is known in the industry for its rigorous certification programs, which include:

- Construction Documents Technology (CDT®) Certificate — A comprehensive overview for anyone who writes, interprets, enforces, or manages construction documents.
- Certified Construction Contract Administrator (CCCA) — Truly understand all facets of the construction process and contractual relationships.
- Certified Construction Product Representative (CCPR) An in-depth understanding of the construction process and superior ability in effective representation.

Networking:

CSI GR brings together a wide variety of professionals serving the building industry. Architects, Designers, Contractors, Manufacturers, Product Representatives, and more gain an avenue through which they can collaborate and grow.

Fun:

Regardless of what ‘fun’ is for you, CSI GR has you covered. In addition to our monthly food/drink events that are covered by the chapter, extra-curricular opportunities to grow your relationships are frequently made available to you.

Jeopardy Night – Where members convene for drinks and games to test their specification knowledge.

Women’s Events – Range from wine-tasting to golf lessons, leadership, and networking.

Facility Walkthroughs – We have toured MSU Bioresearch, Stockbridge Apartments, and are scheduled to tour Fredrick Meijer Gardens this month – come join us! Tour Sign-up.

CSI Annual ‘Hojo’ Scholarship Golf Outing – proceeds from the golf outing go to college students pursuing degrees in a construction-related field. Come join us! Golf Outing Sign-up.

Continuing Education

CSI GR holds monthly meetings that include food, fellowship, and an accredited presentation provided by guest speakers from all over the Midwest.
June: "Fall Protection"

The extra meeting in June was due to the POSTPONEMENT OF OUR USUAL JUNE GOLF OUTING (which is delayed until September). We had to travel cross-country for this meeting location at a new company, SKYLINE FALL PROTECTION, in their new building located about 6 miles due west of the main GVSU Campus in Allendale, MI at 8528 Lake Michigan Dr, just passed 84 th Avenue. Quite a few new faces were seen at this event (20 members and 18 guests made reservations), which was collaborated through the efforts of Charlie Appleby. Eight people were no-shows. Personally, it has been many years since I traveled this highway which was always the shortest road to Lake Michigan when I was younger and we took the kids (my youngest is now 52 years old) to see the “BIG LAKE.” That road, M-45, is almost wall-to-wall businesses on what used to be prime farmland. The presenter for the event was Nick Mendenhall, CDT, of MWA Associates. Nick was assisted during the presentation by Corey Chandler, Gabe Ensing, Jim VanderWall, and Rick Ensing from Skyline.

Nick included several critical graphics showing the different areas of building roofs and how these areas are treated by the 2017 Michigan Building Code and by current 2016 OSHA Regulations. The graphics indicated which devices were required in areas 5 - 6 feet from the roof edge (the RED area) as well as which devices were required in areas 15 feet (the GREY area) from the roof edge. Not only do building codes and OSHA look at things differently, but they go through much detail to explain the differences in time frames for "temporary" and "infrequent" situations when workers must be up on the roofs. Not only are workers exposed to the dangers of being up on roofs. After the program was over, some of the CSI members were discussing how many times that we too were involved as judges for the Associated Builders and Contractors and were exposed to these conditions without adequate protection being available. I think my fingerprint forms are still etched into the steel railings of the catwalk above the scoreboard at the VanAndel Arena when I was judging the structural steel competition. One other time, I was judging the metal roofing on top of a Township Fire Station and the District Chief had the two judges raised over the roof in the bucket of the extended fire ladder just to get a closer look at the "critical joints."

In addition to the usual harnesses and safety lines or barriers that most of us are familiar with, Skyline manufactures several items which are unique to specific conditions that contractors see on a daily basis. Each item or device is tested and certified for compliance with all standards and regulations which apply. Skyline deals in all areas of fall protection and custom safety solutions for factories, steel mills, fabrication shops, lifelines, tether track, and monorail systems for jib cranes, gantry cranes, and specialty devices such as self-retracting lifeline lanyards, First Man up systems, and tie off connection points. They also offer passive systems such as handrail, ladders, cages, and swing gates, skylight safety devices such as netting or nets, grating or grates, cages and guard railing. There was one device that Nick demonstrated with cables that is generally located along the edges of roofs where workers are required to move along. A clip device travels along a raised cable and is attached to the worker’s harness. This device can pass easily over the raised stanchions where the cable is attached to and pass by the stanchion without having to disconnect the safety line. Skyline also makes self-closing gates that are placed around permanent roof hatches. The following CSI members and guests made reservations:

**A SPECIAL MESSAGE**

**SPRING 2019 CDT CLASS WAS A SUCCESS!**

We had 40 people in the review class this year led by Ed Avink, starting the third week of January and ending the last week of March. It was a 10-week class with 2 time options each week; Mondays from 4p to 6p and again on Tuesday morning from 7a to 9a. Classes were also available as a GoToMeeting both days.

If you can remember, we had a brutal 2019 Winter this year, mostly during this class schedule. Many people took advantage of the call-in opportunity. 6 of the 10 weeks had school closings on our class days if that puts it into context.

The class was made up of many groups or types of participants in the construction industry: Architects, Architectural Designers, Interior Designers, Mechanical Engineers, Electrical Engineers, Structural Engineers, Contractors and Product Representatives. Some did not pass the CDT Test but walked away saying “I still learned a lot”. Many did pass and I would like to congratulate them here.

What does passing mean? They can now put that CDT behind their name as a true Certification along with their own personal badge linked directly to the CSI Institute website giving background and confirmation of what they accomplished. Shown here is that badge.

**CONGRATULATIONS TO THE FOLLOWING FOR PASSING THEIR CDT EXAM:**

- Brian Peceny - Progressive AE
- Jeff Kane - Progressive AE
- Travis Smith - Progressive AE
- Sreekanth Menon - Progressive AE
- John Eberly - Progressive AE
- Derek Molenaar - Progressive AE
- Pedro Neira - Progressive AE (C)
- Richard Crook - Progressive AE (C)
- Patrick Gaither - Progressive AE (C)
- Ashley Frusti - Progressive AE (C)
- Suzie Froedge - Progressive AE (C)
- Donald Green - Progressive AE (C)
- Jim Molyneaux - Progressive AE (C)
  (that makes 78 current Progressive employees with their CDT)

- Dan Kowalski - Rockford
- Vince Mattina - FTCH
- Adam Nelson - FTCH
- Long Nguyen - FTCH
- Dave Alphenaar - GMB Holland
- Tom Kloosterman – Tower Pinkster GR

[signature]

Gregg Jones CSI, CDT, CCS, AIA
Instructor in Kalamazoo

The following in his class that passed the CDT exam.

- Kelly Homic - C2AE Kalamazoo
- Craig Jansen - C2AE Kalamazoo

**TRAINING**

Getting excited?

Feeling left behind seeing everyone who is now a "CDT"?

Then see the flyer included in this newsletter for more information or to sign-up!

**COMMUNICATIONS COMMITTEE**

You may have noticed some (more) changes around. We’ve been working hard to make it easier for us to communicate - including our [new (again) website](http://csigrandrapids.org)!

This page was designed to bring even more value to your CSI membership by connecting architects/contractors to the appropriate product rep in the Grand Rapids area. If you missed the initial emails asking for your input and you are willing to have your contact information published on the CSI Grand Rapids website, please email Adam Rottschafer (adamr@monsma.com).
CSI Grand Rapids has a new address! If, for any reason, you need to contact us by mail, please use this address:

Grand Rapids Chapter CSI
1765 3-mile Road NE
PO Box 150532
Grand Rapids, MI 49505

MEET PHIL JOSEPH

Welcome to our new member!
Phil is a Lapeer Michigan Native who attended Eastern Michigan University before going into sales. He is married with one son and keeps busy with work and family while finding time in between to try and stay active with any outdoor activity that he can make happen.

He's currently a territory manager for IDI covering all of West Michigan. They strive to build a company that would supply the market with a wide selection of quality insulation and act as a true, professional resource for independent contractors.

pjoseph@idimn.com
616.729.248

SPONSORSHIP

Become a Sponsor!

Sponsorship is a great way to contribute to our Chapter, and a great way to share your company with a wide range of people - members and others!

If you are interested, please contact Ed Avink (avinke@progressiveae.com), our Sponsorship Chair, or Justin DeMarco (justin.demarco@basf.com) the Chapter President.

CONGRATULATIONS, AMANDA GRAY

Congratulations to Amanda Gray with her recent career move!
Her new role is Strategic Account Manager at Gypsum Management and Supply.
She may be reached at Agray@gypsum-supply.com
Her phone number has not changed: 989-330-5526.
Amanda looks forward to continuing her professional service and CSI support throughout central, north, and west Michigan for the architectural community.

DO YOU HAVE A CHANGE OF STATUS?

Did you change status in contact, job title or employer? If so, take a moment to update with CSI in addition to LinkedIn and your other social media presence. Go to www.csiresources.org log yourself in and select “profile” under your avatar button in the upper right of the web page. It is the best way to let your fellow members contact you and to assure you receive CSI updates and newsletters. If you would like to be featured in the newsletter for a change, please notify either your chapter liaison Brian Welsh at BWelsh@kingscott.com or communications chair Christopher Alexander at alexanderc@progressiveae.com to share your news!
Skateboard Deterrents

The following article is the eighth of several revisiting a series originally published between 2005-2008, called “Number Pick’n”. They take some obscure or interesting item and present a sometimes semi-serious, sometimes just plain fun pondering of where to specify it. Enjoy! — Gary Beimers, FCSI, CDT, CSC, SCIP

Nifty little devices (products) designed to keep those pesky skateboarders from doing damage to architectural edges, ledges, walls, planters, stairs, railings, and even site furniture (benches). They act like mini-speedbumps to deter skateboarders.

Most are cast or machined metal. Sometimes surface mounted, sometimes installed in grout lines, sometimes cast-in-place. One version I saw for railing applications, clamps around pipe railings.

Here’s a few sources . . .

http://www.ravensforgeconeg.com
http://www.skatestoppers.com
http://GrindtoaHalt.com

Sooooo . . . where ya gonna spec them? Would you spec them? Are they merely a potential accessory item to several sections? Or are they an Operation and Maintenance item? Products rather than work results; but when they "work" they get results. Let's look at a few sections . . .

Div. 05 . . . most are made of metal . . .

05 56 00 Metal Castings - some are cast, but not all
05 59 00 Metal Specialties - some are fabricated, but not all
05 70 00 Decorative Metal - some do look nice, but they are more functional than decorative

Div. 03 . . . a lot of the stuff they protect is made of concrete.

03 15 00 Concrete Accessories - might cover planters, ledges, edges, and even some benches; but not a good overall fit. Depends on your application.

03 01 00 Maintenance of Concrete - topics here are of a different nature than deterring damage.

32 01 80 O&M of Site Improvements . . . maybe, but some of the stuff being protected is an architectural element, and not a site improvement. And, I don't think something like a flagpole is in much danger of being used as a skateboard runway. (unless you start from the top)

34 71 13 - Vehicle Barriers . . . are skateboards vehicles?

12 93 00 Site Furnishings . . . some are used on benches.

10 26 00 Wall and Door Protection - Corner Guards (1026 13) and Bumper Guards (10 26 16) are here; but these are generally "interior" surface protective stuff.

10 40 00 Safety Specialties - seems these would make skateboarding less safe.

10 70 00 Exterior Specialties . . . getting warm. But, not sure I'd deal with these in the same area as canopies and flagpoles.

10 80 00 Other Specialties . . . could work. One could say, in a sense . . . "skateboard deterrents are to skateboarders like bird spikes are to birds." . . . Similar work results achieved.

Bottom line, you are probably going to include them in some appropriate section as an accessory, or attachment, to the building element they are being employed to protect.
2019 Mini Building Products University Seminar

September 19, 2019
Bistro Bella Vita
44 Grandville Ave SW
Grand Rapids, MI 49503
7:45 am - 1:00 pm

Register by Aug 30th
nowakdawn@mwacrs.com

Limited Seating—Register Early!!

Seminar Agenda

7:45 am
Registration & Continental Breakfast

8:30 am
Presentations Begin

12:00 pm
Lunch Served

12:45 pm
Questions and Parting Comments

4 CEU / HSW Learning Units Available

COURSE TOPICS:
- Resilient Roofing — Meeting the ASCE 7-16 Standard
- Electromagnetic Induction Welding
- Benefits of a Rigid Cover Board
- Perimeter Metal Edge Wind Design

Subject Matter Experts Presenting From Our Manufacturing Partners

Firestone Building Products
Georgia-Pacific DensDeck® Brand
OMG Roofing Products
METAL-ERA Engineered Roof Solutions
CSI Certification Program

COURSE INSTRUCTOR:
Ed Avink CSI, CDT, CCS
Sr. Project Manager & Specification
Discipline Leader
Progressive AE

As the current CSI Grand Rapids
Chapter Certification Chair, Ed has had
40+ students per year in the CDT®
Prep classes, including those in their
Charlotte office (Go-To-Meeting), plus
many other local industry attenders i.e.
product reps, suppliers, contractors
and local AE firms.

GETTING YOUR CDT MEANS:
- Adding "CDT" after your name, to your LinkedIn, business card and your resume
- Respect from your peers as a result of your understanding of how a project unfolds from conception to facility management and the roles and relationships of all participants.
- Understanding the documentation involved – which drives effective communication amongst all members of the construction team.

CDT® OVERVIEW

The Construction Documents Technology (CDT®) certification provides a comprehensive program of study for anyone seeking to enhance and demonstrate knowledge of writing, interpreting, enforcing and managing construction documents.

Who should sit for the CDT®?

Project architects, contractors, contract administrators, material suppliers, and manufacturers’ representatives are all realizing the advantages of being Construction Documents Technologists.

What does it mean for me?

Pass the Construction Documents Technology exam (CDT®), and you’ll join an elite group of professionals known in the industry for their comprehensive knowledge of the writing and management of construction documents. The course provides 12 AIA HSW learning units that also can be used for other license requirements.

Qualifications:
- High school diploma or equivalent.
- Two (2) years’ experience in construction management and/or completion of college-level coursework is highly recommended.

DATES & TIME:
8 Week Course
Mondays, 3:30 PM - 5:30 PM
Starting September 9, 2019

LOCATION:
Northview High School
4451 Hunsberger Ave NE
Grand Rapids, MI 49525

CHAPTER DUES

CSI has chapters nationwide and one virtual, web-based chapter. These chapters hold monthly meetings featuring guest speakers and educational programs of national and local interest. Chapter members network with peers and develop leadership skills by serving on chapter committees. Use the chapter list below to locate the chapter nearest you. Write the name of the chapter(s) you join and the related dues in the space indicated on the front of this application. Dues rates listed below are for Professional Members only. Contact CSI for dues rates for Emerging Professional and Student memberships. Please write the name of the chapter(s) you join and its dues on the application. To contact a chapter to learn when and where it usually meets, visit www.csiresources.org/communities/components
